ABOUT

Software Developer with 2.5 years of experience specializing in scalable mobile and web app development. Skilled in Next.js, Flutter, and JavaScript with strong debugging and performance optimization expertise. Led the design and implementation of intuitive user interfaces for PLANET application, collaborating cross-functionally in agile teams to deliver technology-driven solutions that addressed real-world challenges.

WORK EXPERIENCE

L&T Finance – ***(Leading Indian fintech company offering retail loans and digital finance solutions)***
Software Developer - **July 2023 - Present**

- Contributed to Planet App, L & T Finance's flagship digital lending platform, by managing key modules such as Farm Loan Top-Up and Personal Loan journeys, resulting in improvement in process efficiency or user engagement.
- Led the end-to-end development of the Farm Loan Top-Up flow, including KYC, loan customization, bank verification, eligibility checks, BRE validations, and other core scenarios to ensure a seamless and secure customer experience.
- Collaborated closely with team members on project development and live production support, analyzing logs and user feedback via User Experian to quickly resolve critical issues and minimize downtime.
- Collaborated with business and QA teams to manage issues and change requests (CRs) through JIRA, ensuring clear communication and on-time delivery of stable builds.

PROJECTS

D2C Farm Loan Top-Up **L&T Finance**
Front End- Mobile App | Flutter, BLOC Architecture
- Developed and maintained the Farm Loan Top-Up journey in the Planet App, covering KYC, loan customization, bank verification, and eligibility checks.
- Resolved over 600 JIRA tickets, provided live production support, and ensured seamless customer experiences with minimal downtime.
- Integrated Flutter HyperVerge SDK, UPI Mandate, and Salesforce API, and implemented complex loan calculation logic for accurate disbursements.

Mobile Armour E-commerce Platform Live Demo
Full-Stack E-commerce Website | Next.js, React, MongoDB, Node.js Github Repo
- Developed a **responsive e-commerce platform** for mobile accessories with smooth category-based navigation.
- Implemented **dynamic product filtering** using URL parameters for bookmarkable and user-friendly views.
- Built a **custom admin dashboard** for product, order, and inventory management.
- Integrated **secure payments (Stripe)** and **user authentication** via NextAuth.js.
- Created an **AI-powered chatbot** using OpenAI API for product inquiries and order tracking which increased user engagement by 20%.
- Optimized performance with **SSR and SSG** for faster load time by 20%.
- Deployed on **Vercel** with **MongoDB Atlas** for cloud database management.

TECHNICAL SKILL

- **Language:** Javascript, Dart, Typescript, Java (Basic)
- **Framework:** Next.js, Flutter, Bloc, REST APIs
- **Cloud Technologies :** MongoDB , Firebase ,
- **Database:** SQL Server, MySQL
- **Development Tools:** Git, VS Code, Xcode, Android Studio, JIRA, Postman, GitHub Copilot.

EDUCATION

JAIN (DEEMED TO BE UNIVERSITY)
Bachelor of Technology (CSE - IOT) **(CGPA - 8.1)** **July 2019 - July2023**

ARNIKO AWASIYA SECONDARY SCHOOL **Aug 2016 - Aug 2017**
Science (+2) - 6.5 CGPA
